

## Soil Classification & Education 2

Toruń, Poland 12-14th September 2022

Globalization and global environmental issues, as well as unification of scientific research and teaching on the European Union and global levels require harmonization of technical languages, such as the terminology used in soil science. An important part of our technical language is soil description and classification. The long-term development of the unified system – World Reference Base for Soil Resources (WRB), is an important challenge for teaching of soil science related subjects in Europe and the World. National/local focus in soil sciences teaching still dominates which complicates exchange of information, students and professionals. The aim of this conference is to present solutions for **international education in soil science**, elaborated within the Erasmus+ SYStem project, to discuss the new attempts at soil description and classification and to share ideas on how to educate Youth and Adults for the benefit of society and environment. Another aim is to raise awareness of global pedosphere-related threats like soil depletion, erosion, salinization and desertification. Participants' experiences and thoughts related to soil science teaching would be a frame for both indoor and outdoor discussions.

*The Soil Classification and Education 2* conference will be held September 12-14th, 2022 in Toruń. Its organization is supported by Erasmus+ grant, therefore the conference fee (which includes accommodation and meals and fieldtrip) is very moderate (however number of such places is limited).

Details and the registration form can be found on the event website: <https://sites.google.com/view/soil-classification/home>

Co-funded by the  
Erasmus+ Programme  
of the European Union
